Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 5-9, 11-15 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Tu (USPN 5308794).

Tu teaches a composition which can be used for sealing a weld joint with a sealant comprising Al with about 51.6% Ge which melts at about 420 C (col 2 lines 39-42 and figure 2).

3. Claims 19, 25 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Humpston et al. (USPN 5031822).

Humpston teaches a method of sealing a weld joint with a sealant comprising Al, Ge and Ag (col 3 lines 4-36), the sealant having a thickness of 0.00059 – 0.0039 inches (col 2 lines 64-68).

Art Unit: 1725

4. Claims 12-17, 19, 20, 22, 23, 25, 26 and 29 are rejected under 35 U.S.C. 102(e) as being anticipated by Suzuki et al. (US 2002/0089828 A1).

Suzuki teaches a composition which can be used for sealing a weld joint with a sealant comprising Al, Si and Ge (paragraph 19) or Al with about 40-60% Ge which melts at about 420 C (paragraph 31). At least one structural member comprises Al (paragraph 4). In the sealing method the sealant (solder) is placed between the members and heated such that it fills the space between them (figures 2, 6 and paragraphs 43, 69-71 and 107-110).

Allowable Subject Matter

5. Claims 3, 4, 10, 18, 21, 24, 27, 30 and 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Knight et al. (USPN 6497922 B2), Martin et al. (USPN 6045028) and Mahoney (USPN 6543670 B2, IDS).

Art Unit: 1725
